# Climate Control from Concept to Completion

Edward B. O'Reilly & Associates, Inc., is Delaware Valley's leading specialist in climate control and refrigeration. We are equipped to handle any job from concept to completion - and beyond - to assure you trouble-free service for years to come.

Whatever your heating, cooling or humidifying problems and whatever their scope we offer you the experience of experts trained in every phase of the field from sales engineering and designing to installation and maintenance. And just as important, every job from a one-room office installation to completely

climatizing a vast shopping mall or industrial plant receives the same careful attention to detail every step of the way.

Our staff of engineering specialists will work with you, your engineers, your contractor or architect. They will analyze your requirements and recommend the most efficient and economical solution. Often this requires many hours of inspections, discussions and the conversion of engineering data to a sound, workable plan. When you evaluate our recommendation and make your decision you are under no obligation.

You evaluate our recommendations and decide for yourself.

Once the plan is agreed upon, we are equipped to begin work immediately. Our installation and maintenance department will be prepared to make selection of your equipment so that installation can be made without delay.

An increasingly important factor that must be considered in the selection of the best possible air-conditioning and refrigeration equipment is the rising cost of energy. A well-

planned system can save you hundreds of dollars yearly in operating costs alone. For this reason Edward B. O'Reilly has on its staff experts in the field of fuel conservation, particularly electrical power. Since the start of the fuel crisis their recommendations have resulted in saving our customers thousands of dollars yearly by reducing fuel consumption without curtailing vital services. These savings are as good as money in the bank to you and can significantly reduce the overall cost of installation.

# ...and more from Edward B. O'Reilly.

Service and Preventative Maintenance are an essential part of E.B. O'Reilly's complete program of climate control and refrigeration.

After initial start-up of your installation, you receive a one-year Certified Maintenance Contract at no extra cost. It assures you a trouble-free system for one year. This maintenance contract is renewable on a yearly basis for a minimal cost and includes these benefits:

1. Emergency service available 24 hours.
2. Start up and shut down equipment seasonally.
3. Four regularly scheduled inspections (our minimum contract).
4. Paint tower or air cooled condenser.
5. Steam clean air cooled condenser.
6. Chemically clean coils and condensate lines.
7. Chemically scale clean water cooled condensers.
8. Check carefully for refrigerant leaks.
9. Adjust tension on all belts.
10. Check electrical components.
11. Check for air leakage.
12. Lubricate all moving parts.
13. Check all operating temperatures and pressures: adjustments as requested.
14. Drain water from all parts of system likely to freeze during winter.
15. Furnish and install all parts under manufacturers warranty.

Over 700 of our customers subscribe to our preventative maintenance contract. Records show that our scheduled inspections of their systems have reduced "down time" more than 75%.

Our fleet of radio-dispatched trucks is on call 24 hours a day. They are manned by experienced service technicians and equipped with parts, tools and testing instruments for fast "on-site" repairs.
